LATEST TECHNICAL INSIGHTS

- Successful formulation development for biologics using a unique biophysical prediction and screening platform – this article gives a deep dive into our transformative approach to complex biopharmaceutical formulation development. [Read Article](#)
- Development of a temperature control system for a benchtop AKTA Pure 150 – here we shared how during the development of a specific preparative chromatography operation, temperature was found to significantly affect yield. The Tanvex downstream process development team designed and built a temperature control system so that the scale down model could accurately replicate the GMP manufacturing process. [Review Poster on our resource page](#)

In addition, we are happy to announce that we have expanded our Business Development team to offer enhanced client experience. Looking ahead to Q2 2024, Tanvex CDMO will be exhibiting and having technical presentations at the following conferences.

 <p>Booth: 225 BPI West US March 11-14, 2024</p>	 <p>Booth: 208 Festival of Biologics April 15-17, 2024</p>	<p>Book a Meeting</p>
<p>Book a Meeting</p>	 <p>Booth: 911 Bio Convention June 3-6, 2024</p>	 <p>TIME: 10:00 AM - 3:00 PM PST Drug Discovery & Bioanalytical Assays Symposium April 14, 2024</p>

We look forward to seeing you and staying in touch. Please reach out to Tanvex whenever your outsourcing needs arise.
